## SAFETY DATA SHEET - CALIBRATION CHECK GAS

---

**PRODUCT:** <2000ppm HYDROGEN SULPHIDE/≤500ppm CARBON MONOXIDE / ≤0.7%PENTANE / ≤21% OXYGEN / NITROGEN **PAGE:** 1/4

**SDS NO:** 061B **Version:** 2 **Date:** 29<sup>th</sup> October 2008

---

### 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY

SDS NO: 061B

Product Name: Hydrogen Sulphide/Carbon Monoxide/Pentane/Oxygen Balance Nitrogen (≥ 17 litres)

Company Identification: See heading and/or footer

---

### 2. HAZARDS IDENTIFICATION

Hazards identification Compressed gas  
Hydrogen Sulphide and Carbon Monoxide are both toxic by inhalation  
May impair fertility or cause harm to the unborn child

---

### 3. COMPOSITION/INFORMATION OF INGREDIENTS

Substance/Preparation Preparation

Composition/Impurities Contains no other components or impurities, which will influence the classification of the product

---

### 4. FIRST AID MEASURES

Inhalation In high concentrations may cause asphyxiation and/or Cyanosis. Symptoms may include loss of mobility/consciousness. Victim is not aware of asphyxiation. Remove victim to uncontaminated area wearing a self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

Ingestion Ingestion is not considered a potential route of exposure.

---

### 5. FIRE-FIGHTING MEASURES

Fire-fighting measures These containers hold gas under pressure, with no liquid phase. If involved in a major fire, they should be sprayed with water to avoid pressure increases, otherwise pressures will rise and ultimately they may distort or burst to release the contents. The gases will not add significantly to the fire, but containers or fragments may be projected considerable distances - thereby hampering fire-fighting efforts.

**SDS NO: 061B** **Version: 2** **Date: 29<sup>th</sup> October 2008**

**6. ACCIDENTAL RELEASE MEASURES**

Accidental Release Measures In terms of weight, these containers hold very little contents, such that any accidental release by puncturing etc. will be of no practical concern. However, care should be taken in small enclosed areas. (See Section 3)

**7. HANDLING AND STORAGE**

Handling and Storage Suck back of water into the container must be prevented. Do not allow back feed into the container. Use only properly specified equipment, which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.

Cylinders should be stored upright and it is good practice to keep inert, flammables and oxidants apart. All cylinders should be stored with the regulator detached, this provides a very useful safety measure as it prevents accidental high pressure gas discharge. Store either outside or in a well ventilated area, away from ignition sources, ideally in a secure storage area.

High temperatures will cause the gas to expand resulting in a rise in pressure, the upper recommended limit is 45°C or 50°C, however, there is a large safety margin on the burst pressure. Mtech guarantees all mixtures to 0°C.

**8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

Personal protection Ensure adequate ventilation.  
 WEL Carbon Monoxide 30ppm (8hr TWA) 200ppm (15min TWA)  
 Hydrogen Sulphide 5ppm (8hr TWA) 10ppm (15min TWA)
