

## 110l test can

**Content**

110 l non-reactive or reactive or high-reactive gas mixtures or pure gas at 68 bar and 20 degree celsius

**Dimensions**

360 mm height, 90 mm diameter

**Geometric volume**

1.6 l

**Filling pressure**

68 bar

**Material**

Aluminium

**Weight**

1.1 kg

**Valve thread**

5/8"

**Suitable valve/controller**

HPC controller with fixed flow or valve MiniFlo with flow meter

**Application**

Sensitivity test and calibration of portable and fixed gas detection equipment

**Mixture accuracy**

+/- 2% or 2 ppm

**Mixture stability**

36 month for non-reactive mixtures  
For reactive and high reactive mixtures see separate informations
