

## 58l test can

### Content

58 l non-reactive or reactive or high-reactive gas mixtures or pure gas at 34 bar and 20 degree celsius

### Dimensions

360 mm height, 90 mm diameter

### Geometric volume

1.6 l

### Filling pressure

34 bar

### Material

Aluminium

### Weight

1.1 kg

### Valve thread

5/8"

### Suitable valve/controller

HPC controller with fixed flow or valve MiniFlo with flow meter

### Application

Sensitivity test and calibration of portable and fixed gas detection equipment

### Mixture accuracy

+/- 2% or 2 ppm

### Mixture stability

36 month for non-reactive mixtures  
For reactive and high reactive mixtures see separate informations
