

## DuoFlow Regulator

A dual purpose regulator that, with the push of a button, can deliver a continuous flow of gas or gas on demand. The DuoFlow regulator is suited for bump testing and calibration of equipment. It is more compact, robust and simpler to operate than the trigger type regulator traditionally used in both laboratory and field environments.

The DuoFlow is designed for use with Mtech 34 Litre, 58 Litre and 110 Litre non-refillable cylinders.

### Key Features and Benefits

- Standard C10 inlet
- Easy to use
- Robust construction
- Compatible with Mtech 34, 58 and 110 Litre non-refillable cylinders

### Specification

<b>Body &amp; Bonnet:</b>	Nickel Plated Brass
<b>Piston:</b>	Brass
<b>Piston Seal:</b>	Viton®
<b>Inlet Connection:</b>	C10 (5/8" 18 UNF)
<b>Valve Seat:</b>	Teflon
<b>Gauge:</b>	0-1000 psig max
<b>Number of Stages:</b>	2
<b>Flow Preset:</b>	1 litre per minute
<b>Mechanism:</b>	Push to "ON" for squirt flow. Open fully for continuous flow.
<b>Part number:</b>	Duoflow
