

S Flow Regulator

The S Flow regulator is designed to provide a higher level of flow control than the standard Mtech MiniFlow 1/2 models for more demanding applications. In addition, the integrated pressure gauge allows for clear indication of cylinder contents, making calibration more efficient and easier to manage.

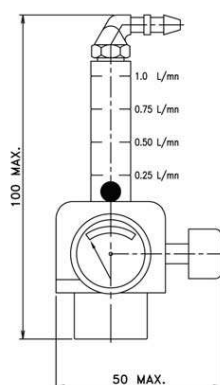

The S Flow is designed to be compatible with standard Mtech 20, 34, 58 and 110 litre non-refillable cylinders.

Key Features and Benefits

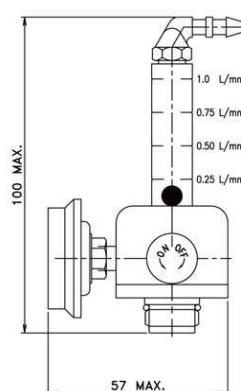

- Available in C10 and standard aerosol (7/16" x 28 UNEF) connections
- Compatible with Mtech 20, 34, 58 and 110 Litre non-refillable cylinders
- Simple to use, clear flow indication
- Integrated pressure gauge
- Robust construction

Specification

Inlet:	Aerosol (20L) C-10 (34, 58, 110L)
Outlet:	Barbed
Body:	Aluminium bonnet, nickel plated brass base
Gauge:	Brass 28 Bar Max (20L) Brass 70 Bar Max (34, 58, 110L)

20 liter
 Part number: SFlow 1

34,58,110 liter
 Part number: SFlow 2
